CAT40 ER Collet Chucks & Collets

Huge Savings on a 6-Pack

1. Select 6 Collet Chucks
2. Choose A Collet Set
3. Save \$\$

Promo Code **6PAK40**

Sale Price: **\$ 955.00**

Possible savings of up to **\$ 1,062.70**

(Promo not eligible for online ordering. Please be sure to include the promo code when sending or calling in your order.)

CAT40 ER Collet Chucks

- Threaded through holes for a back-up screw (tool stop) or coolant through when removed
- Factory balanced to save spindle life, tool life, and increase productivity
- DIN coolant option - standard
- All Ground Body
- 100% Forged Construction
- Wrench not included

5 MICRON AA ER COLLET SETS

DIN 6343 Precision Collets have a runout of 20-30 microns (0.02 - 0.03mm).

GS High Precision Collets have a runout of 10-20 microns (0.01 - 0.02mm).

The new **GS Extreme Precision AA Collets** have a runout of only 5 microns (0.005mm).

Features & Benefits:

- 12 slots instead of 16 allows sufficient collapse while increasing the area of contact with less tendency to distort.
- All edges are deburred and rounded to promote good interface with the taper of the chuck without the tendency to damage it. This results in more consistent repeatability.
- Collets are polished to eliminate blemishes that promote corrosion. Better corrosion resistance will result in longer product life of both the collet and the holder.
- Highly polished OD surfaces reduce the amount of force absorbed by friction between the collet and the collet chuck seat, increasing the grip force on the cutting tool. The inside bore of the collet is intentionally left unpolished to increase the friction between the collet and the cutting tool shank.
- Maximized Concentricity
- Evenly distributed cutting edges for high performance machining
- Minimized variation of cutting edges
- Consistent cutting profiles ensure the job stays within desired tolerances
- Improve system performance and lower cost per piece when used with quality GS chucks

The result of an improved AA collet in a quality GS chuck is increased gripping force, improved rigidity, decreased runout, and a renewed confidence in your collet chuck system.

Soft Jaw Forming Ring

The forming ring is used for cutting soft jaws by clamping and extending the thru hole to increase the accuracy of clamping the workpiece

- The size can be adjusted against the helical slot.
- Pin can be rotated 180° to extend the clamping range.
- No need to drill new hole. The hole on the soft jaw can be used directly for pin
- Hardened and ground steel for durability

STEEL TURNING CVD GRADE

[Current Grade]

- Good surface roughness and welding resistance.
- Oxidation resistance at high temperatures and plastic deformation resistance.
- Excellent chipping resistance due to improved adhesion.
- Fine coating layer with toughness and wear resistance.
- Exclusive substrate material to improve wear resistance.

[New Grade (PT22C)]

Precision Milling Machine Vise

- Vises are matched (bed height: 2.875")
- Interchangeable soft jaws
- Chip cover protects leadscrew from damage
- An integral key and large fasteners reduce deflection by 50%

8" X 10" Opening: **\$1,522.08** - Code # 327-300

Multi-tasking 5-Axis Modular Vises

MADE IN ITALY

The MULTITASKING range of vises has been specially designed for 5-axis machines. Working on 5 sides of the workpiece, it allows the best optimization of the machining cycle. Thanks to the compact design this kind of vise can be installed on all machining centers. The use of GRIP jaws is strongly recommended with multitasking vises.

- Self-centering or eccentric
- Eccentric jaw adjustment in steps of 2mm
- Highest accuracy in positioning and alignment ($\pm 0.02\text{mm}$) due to ground rack teeth on both the base and the fixed jaws
- Minimum deflection
- Solid, rigid construction and maximum clamping ratio to the total length
- Positioning through ground holes or keyways
- All case hardened to HRC60 for durability
